NO-COAT®

Drywall Corner

The NO-COAT® Structural Laminate (SLAM®) design represents a revolutionary drywall corner system that provides superior strength and durability, installs faster, and delivers bottom line savings in labor.

Mud applied, extra tough drywall corners that withstand severe impacts and settling. Won't blister, bubble or edge crack. Available in Outside and Inside 90°, Bullnose, L-Trim and Arch profiles.

- High-strength, tapered copolymer core
- Severe impact resistance, will not dent
- Corners will not separate from wall
- Crisp sharp lines without ridges
- Withstands significant shifting due to lumber drying, settling, humidity and temperature differences
- Surface paper is perfect for applying paint and textures

Made With
SLAM
TECHNOLOGY®

Strong, Straight Edges

- Outside 90 has a specially engineered profile that makes the boxing of the bead easier and faster
- Bullnose has a ridgeless radius that offers an easily paintable paper face that won't chip or crack and is scratch resistant
- L-Trim requires no masking allowing for a quick and clean finishing of exposed drywall edges and reveals for a perfect edge
- Arch beads conform to the radius to create a perfectly smooth and rounded corner without the need for glues or staples for installation

Slam® Design Integrates New Technologies and Materials that Outperform All Others.

Outside 90

When installing drywall for 90° corners, hang Outside 90 as shown in Figure 1a.

Figure 1a

Figure 1b

Bullnose

When installing drywall for Bullnose corners, hang as shown in Figure 2a, creating an open area for the radius of the bead. Ensure that drywall at the corners do not touch as shown in Figure 2b.

Figure 2b

**Made With
SLAM
TECHNOLOGY®**

Outside 90 and Bullnose

1. Using the taping knife, apply joint compound to drywall, slightly beyond where the edge of the corner will be. Or use hopper to fill bead.

2. Place corner trim on wall, ensuring it is aligned tightly to the ceiling. Press into position.

3. Use the roller to embed the trim. Or embed using even pressure, running the knife over it at a 45° angle. Use the taping knife to skim over the edge with joint compound. Let dry thoroughly.

4. Use the wider finishing knife to skim over the edge again. Let dry thoroughly. Lightly sand and paint.

L-Trim

1. Use the taping knife to apply joint compound to drywall, slightly beyond where the L-Trim will be. Or use hopper to fill bead.

2. Place L-Trim on wall. Press into position.

3. Use the roller to embed the trim or embed with a knife, using even pressure running at a 45° angle. Use the taping knife to skim over the L-Trim edge with joint compound. Let dry thoroughly.

4. Use the wider finishing knife to skim over the L-Trim edge again. Let dry thoroughly. Lightly sand and paint.

CertainTeed Double Barrel Hopper

For use with NO-COAT inside, outside and bullnose corners and Flexible Corner rolls.

Accommodates all inside and outside angle without time-consuming part changeovers and reconfiguration.

Features/Benefits:

- Eliminates part changes or reconfigurations — handles both inside and outside angles.

- Single piece gates with ergonomic hand knob allow for fast and easy adjustments
- High density polyurethane tank and gate controllers
- Stainless steel reservoir trough and gates
- Dimension: 14" x 14" x 13.5"
